Cryptoloans is the first **Blockchain-platform** for secure P2P-lending, trading and exchange cryptocurrency. We are the first who created a technical solution that allows guarantee the return of creditor`s cryptocurrency funds which were issued on credit in the event of the borrower failing to fulfill his obligations, and to borrowers gives a 100% guarantee of obtaining a loan for the purchase of cryptocurrency. The given decision will allow to democratize cryptocurrency market and to stop the further monopolization of this market by early investors and large players. The project solves a lot of global problems in such areas as investment in cryptocurrency, P2P-lending, trading in financial markets, exchange of cryptocurrency and algorithmic trading. **Cryptoloans** platform is intended to continue cryptocurrency expansion among all sections of the population of the Planet, regardless of their social status and regalia.
